

SLIDEShare

Electronic bidding : e - bidding (electronic market : e - market) refers to the use of electronic means to conduct business transactions. It involves the use of computers and telecommunications equipment to facilitate the exchange of information between buyers and sellers. Electronic bidding can be used for a variety of purposes, such as the sale of goods or services, the auctioning of assets, or the negotiation of contracts. The use of electronic bidding has become increasingly common in recent years, due to its efficiency and convenience.

Non-synonymous mutations in the *CDKN2A* gene are associated with increased risk of breast cancer in women with BRCA1 or BRCA2 mutations.

Digitization of business processes is a key element of e-commerce. It involves the use of electronic means to perform various business activities such as sales, procurement, and delivery. This can be achieved through various technologies such as the Internet, mobile devices, and cloud computing.
